#### HOW TO USE KOLOR-SAFE® DRY BASE NEUTRALIZERS:

1. Evacuate employees from the spill area.
2. Wear personal protective equipment compatible with chemicals involved.
3. Ventilate the contaminated area.
4. Contain the spill with universal sorbent material.
5. Slowly sprinkle or pour the base neutralizer on the spilled caustic.  
CAUTION: Some HEAT or GASSING OUT may be generated.
6. The color change indicator changes from PURPLE to BLUE during neutralization. Color change must occur.
7. Apply dry base neutralizer until the color change indicator first turns a yellowish color. Do Not Over-Neutralize. NOTE: Very concentrated solutions will yield solid precipitates before the color change.
8. Allow neutralized liquid to cool.
9. Soak up remaining neutralized liquid with sorbent materials.
10. Place used sorbents into temporary disposal bags.
11. Wipe up residue with non-woven cloth material.
12. Dispose of all used articles (sorbents, neutralized liquid, etc.) according to local, state and federal regulations.

NOTE: Depending on the extent of the clean-up process, additional equipment may be required.

CAUTION: Do not use KOLORSAFE® Dry Base Neutralizer on any solution containing (in any form) metallic nitrates, cyanides, sulfides, strong oxidizers, or hypochlorite (i.e. sodium/calcium) solutions since dangerous gases will be generated.
