HOW TO USE KOLOR-SAFE® KOLOR-LOCK™:

1. Wear required protective clothing and equipment when cleaning up acid spills.
2. Determine the concentration level of the acid and apply appropriate KOLOR-LOCK™ product.
3. Sprinkle KOLOR-LOCK™ on the spill. The spill will change color during neutralization. Continue to apply KOLOR-LOCK™ until the neutralized color is as it appears on the label.
4. Some mixing may be required as KOLOR-LOCK™ solidifies as it neutralizes.
5. Allow neutralized solid to cool.
6. Sweep or shovel the neutralized solid and dispose of according to local, state and federal regulations.
7. Wipe up residue with a damp, non- woven fabric cloth.
8. NOTE: Very concentrated solutions will yield solid precipitates before the color change.
