#### HOW TO USE AQUALOCKIT®:

1. Evacuate employees from the spill area, if necessary.
2. Wear personal protective equipment compatible with chemicals involved.
3. Ventilate the contaminated area.
4. Determine if the contaminated water, sludge, neutralized acids or bases, etc. are pH neutral (pH 6-7).
5. Sprinkle some of the AQUALOCKIT® onto the neutral spill.
6. Allow the AQUALOCKIT® to absorb the pH neutral liquid.
7. Collect the used AQUALOCKIT® by sweeping, vacuuming, shoveling, etc.
8. Place the used AQUALOCKIT® into a temporary disposal device.
9. Dispose of all used articles according to local, state, and federal regulations.

NOTE: AQUALOCKIT® Solidifier will not gel spills that are not pH neutral. It is strongly recommended that KOLOR-SAFE® Dry or Liquid Neutralizer be used to neutralize the spill prior to use of AQUALOCKIT® for maximum performance.
