You have requested a MSDS sheet on our Multi-Purpose Soakers.

We are pleased to inform you that these tissue products that are supplied to you by National Packaging Services do not require an MSDS.

It is our interpretation that the product is an “article” as defined in the OSHA regulations [29CFR1910.1200, Section (C)]. Further, this article does not release or otherwise result in exposure to hazardous chemicals under conditions of intended use. As stated in section (b), Subsection (5), the Hazard Communication Standard does not apply to such articles. Thus, a Material Safety Data Sheet is not required.

All codes are comprised of 1 or more of the following components:

- Tissue comprised of 100% recycled fiber with no less than 30% post-consumer waste
- Polyethylene plastic film
- Polypropylene spunbond non-woven material
- Water based glue, non-toxic

If you should require additional information, we will be happy to try to provide it.

Sincerely,

NPS Corporation
